Style Notes

Notes on overall style

- Please note that all entries in an APA bibliography should be **double spaced**, be listed **alphabetically** and use **hanging indentation (1/2 inch)** for more than one line.

- **Invert all authors’ names**; give **surnames and initials** for only up to and including seven authors. If there are more than seven authors, abbreviate the seventh and subsequent authors as “et al.”. Omit all titles and degrees (e.g. Dr., Professor, Mr., Ms., PhD, and MD) in the Works Cited list. Include only essential suffixes such as Jr. or a Roman numeral.

- **Capitalize** only the **first word** of the **article, website or work’s title** and **sub-title** (if any), the first word after a colon or a dash in the title, and proper nouns. Do not capitalize the first letter of the second word in a hyphenated compound word.

- For more information, please refer to the **Publication Manual of the American Psychological Association Sixth Edition** (Ready Ref BF 76.7 .P83 2010) available in the Ready Reference collection (please see the Reference Librarian). For further information on electronic source documentation, visit the **APA Style web site** [http://www.apastyle.org/](http://www.apastyle.org/)

For more information on how to format your paper, please use the link below to view a sample APA paper. This sample paper will show you how to set up your title page, the abstract page (if required), the body of the paper (with headings, if required), and reference page.

## Citing Sources In-Text

In text citation provides a shorthand author-date system which briefly identifies the source of the information used. The full entry for that source is located in the reference list. Proper in text citation is comprised of the last name of the author or authors, and the year of the publication, and is placed at the beginning or the end of the sentence.

Additional Notes

Publication Manual of the American Psychological Association Rule 6.09: **Citations Within Quotations** [p. 173] states:

*Do not omit citations embedded within the original material you are quoting. The works cited need not be included in the list of references (unless you happen to cite them as primary sources elsewhere in your paper).*

"In the United States, the American Cancer Society (2007) estimated that about 1 million cases of NMSC and 59,940 cases of melanoma would be diagnosed in 2007, with melanoma resulting in 8,110 deaths" (Miller et al., 2009, p.209).
